PROJECT DETAILS

Metropolitan Life, US

Project: Helpdesk for Human Resources (September 04-Till Date)

Environment: S/w: Peoplesoft 8.4, Windows 2K, Oracle

Tools: Application Designer, Integration Broker, Process Scheduler

Description:

MetLife has decided to replace the existing Quintus application with the PeopleSoft HR Help Desk software. This will enable the Service Center to manage HR related inquiries

and issues and support the entire request-to-resolve process in a reasonable amount of time. To Provide real time integration with HCMS to support the delivered '360-degree view of employees' case history and HR data, enabling them to manage and resolve more employee HR issues without opening a case, Provide real time integration with HCMS to ensure the company, location, state, department, worker, personal data and workforce data are in sync within both applications (HRMS and CRM) using the delivered EIP solution. (Enterprise Integration Points) and to provide integration to EZHire where automatic creation of a new hire case is open whenever a new hire is processed within EZHire. As well as automatically add new hire tasks to case.

Role & Responsibilities: Technical Team Leader

Customization:

- Working on PeopleSoft Application Messaging.
- Working and researching on OTB PeopleSoft delivered Enterprise Integration Points.
- Configuration of OTB PeopleSoft delivered Nodes and Message Channels and setup of transactions between the nodes.
- Integration with HCMS using the 'HR Helpdesk 360 Degree View' to display payroll, employee and benefit, etc. data. CRM 360 view will display HCMS data that are delivered by OTB 360 EIP.
- Integration using Inbound Business Interlink and Iscript.
- Contributing to Functional Design Documents.
- Contributing towards analyzing technical requirements and various PeopleSoft functionalities, which are fit to the Project or can be customized as per client needs.

ASG Software Solutions

Project: PeopleSoft integration (March 04-September 04)

Environment: S/w: Peoplesoft 8.4, Windows 2K, SQL Server

Tools: Application Designer, Component Interface and Process Scheduler

Role & Responsibilities: Technical Team Leader

ASG decided to build a seamless adapter to integrate its scheduler software ASG-Zena with Peoplesoft to run the processes in Peoplesoft, which are usually run through Peoplesoft Process Scheduler Tool. Used Peoplesoft Component Interface, tool for integrating Peoplesoft with the third party systems. Role involves integrating Peoplesoft Process scheduler with ASG-Zena using Component Interface API's for

Login to PeopleSoft Application Server

Methods to get list of job.

Method to schedule the process.

Action Commands like check status, hold, delete, restart or cancel a process/job.

Customization:

- Created as well as customized many Component Interfaces as per the client need.
- Developed many user defined methods as well as used standard Component Interface Methods.
- Added new pages for interfacing purposes.
- Created menu definitions.
- Associated newly developed pages to a menu using Application designer
- Defined new processes in the process scheduler.
- Customized existing tables and pages as per the client requirement.

Computec Inc, US

Project: PeopleSoft -HR (August.03- March 04)

Environment: S/w: Peoplesoft 7.5, Windows 2K, Oracle 7.X

Tools: Application Designer, Maintain Security, Process Schedule Manager.

As a part of global strategy, Computec had decided to implement PeopleSoft 7.5. The purpose of the project was to standardize Human Resource processes, create a common database and automate processes.

Role & Responsibilities: Technical Team Member

Customization:

- Added new fields to records and panel to capture responsibilities in the previous organization.
- Added a record and panel to capture information gathered during exit interviews.
- Modified personal_data1 and Job_data3 panels.
- Added translate values to Employee class etc.
- Customized run control tables.
- Defined new panels for customized reports.
- Created menu definitions for the reports.
- Associated newly developed panels to a menu using Application designer.
- Defined new processes in the process scheduler for reports.

Reports

- Designed new processes for process scheduler requests for SQR processes.

Security:

- In consultation with the client, defined security strategy, created operator classes and operator profiles.

Global Financial Services Inc, US

Project: PeopleSoft -HR (Jan.03 - August.03)

Environment: S/w: Peoplesoft 7.5, Windows NT, Oracle 7.X

Tools: Application Designer, Maintain Security, Process Schedule Manager.

Implemented core HR module of Peoplesoft HRMS for client. Various panels are created and customized according to the needs of client.

Many reports are created and modified with the help of reporting Tools like SQR. Data was mapped from/to the Peoplesoft tables to the SQR. Resolved the inconsistencies occur due to customizations.

Role & Responsibilities: Technical Team Member

- Responsible of the design and development of Peoplesoft core HR module client specific functionality.
- Customized and created new Peoplesoft modules (including tables, menus, panels and process definitions) using Peopletools.
- Responsibilities including mapping the data to/from the Peoplesoft tables to the SQR.
- Integrated client needs and Peoplesoft functionality and regulatory standards to design report specifications.
- Used PSQuery tool in this project for modifying queries definitions for reports.
- Fixing of defects and work with GSC (Peoplesoft) to solve them.

Customization

- Added new panels for the reports created.
- Created menu definitions for the reports.
- Associated newly developed panels to a menu using Application designer
- Defined new processes in the process scheduler for SQR reports
- Customized existing tables and panels as per the client requirement.

Reports

- Customized and maintained PeopleSoft delivered reports. Developed new reports as required by users using SQR.

PAV Audio Visual, India

Project: Education Information Systems (June.01 to Jan. 03)
Tools: Visual Basic, Microsoft Access, and SQL.

Description: PAV Audio Visual is a leading co. in education related software. Created many educational software with the use of VB as a front end for PAV. PAV software has been used in Indian school and colleges for teaching purpose, created many such software according to the client needs.

Role & Responsibilities:

Created many Educational software used by School and College students.

Some of the main software created:

Biology software for Indian schools
Chemistry software for Indian schools
Physics software for Indian schools
Geography software for Indian schools
Mathematics software for Indian schools
